## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 15, 2012 has been entered.

### ***Allowable Subject Matter***

2. Claims 43, 46-49, and 54 allowed.
3. The following is an examiner's statement of reasons for allowance: the Prior Art does not disclose or suggest a prosthetic foot and lower part of leg comprising the combination of structural and functional limitations as set forth in independent claim 43, particularly comprising: a semi-rigid, resilient foot keel extending in a longitudinal direction; a semi-rigid, resilient leg portion attached at a lower end to the foot keel; wherein the semi-rigid, resilient leg portion includes a plurality of elongated, upwardly extending, generally arcuately curved in the sagittal plane, substantially vertically oriented, semi-rigid, resilient members which are spaced apart in the sagittal plane intermediate their upper and lower ends and which are anterior facing convexly curved at their lower ends forming an ankle joint area of the prosthesis and which extend upwardly above the ankle joint area in a substantially anterior facing convexly curve to a substantially vertically oriented upstanding upper end of the leg portion, at least one of said

plurality of semi-rigid, resilient members is wider in the frontal plane than thick in the sagittal plane, the semi-rigid, resilient leg portion storing energy during force loading of the prosthesis and returning energy during force unloading to increase the kinetic power generated for propulsive force by the prosthesis, and wherein the semi-rigid, resilient members of the leg portion are substantially leaf spring type members which are coupled together at their upper and lower end portions, and whereby the substantially vertically oriented upper end portion of the semi-rigid resilient leg portion in response to amputee gait force is displaced in a substantially longitudinal direction

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
